## AWARDS

I like to make small and big websites, with clean and beautiful interfaces, without compromising the usability of the websites. I primarily do the backend and the database management jobs. I use python and mongoDB (the latest technologies) to keep you and your work easily available to your customers with ~zero downtime.

# EXPERIENCE

## WEB DEVELOPER INTERN

SOUTH EASTERN RAILWAYS | RANCHI

- Developed a fully integrated Web Application Form that the future interns (next batches) can use to apply for the said internship.
- Started the data entry of Retired service-holders, which Initiated the digitisation process by creating frameworks for entering data.

June 2018 - July 2018

## CREATIVE CONTENT INTERN

SOLVE | INTELLIFY

- Worked on generating ideas on better collaboration with the Govt. of Delhi and Delhi Teacher's association for the creative developement of future minds.
- I also contributed in creating a question pool for the [ISCO](#) examination, that tries to bring out the creative side of young minds, rather than rote memory.

August 2017 - October 2017

## INTERESTS

Apart from being a web developer, I enjoy most of my time being indoors.

When not forced outdoors, I follow a number of sci-fi and fantasy genre movies and television shows, and I spend a large amount of my free time exploring the latest technology advancements in the front-end and the back-end web development world.

I also like competitive coding, and invest my time in learning better ways to things more efficiently.

I try to find solutions to the more complex issues of the world, such as increasing hunger, encroaching population, and lack of education.

I love teaching anyone who comes to me (which mostly comprises of a handful of junior-school students) and I like to see their enthusiasm as I introduce them to things beyond their textbooks. I like making education fun for them.
